

By Jonathan Orji

Increase Revenue

- It helps to release more quickly, more value-generating features for the business
- It reduces time to market for new features

• It helps to reduce downtime from a deployment related crash or bug

 It helps our developers to spend less time on issues from new codes

Avoid Cost

It helps to reduce bugs in production which reduces the time and cost of testing

It helps to prevent embarrassing and costly security holes

It helps to reduce costly human errors
